SUMMARY

Motivated double-degree undergraduate currently pursuing a BSc (Hons) in Information Technology (4th year) and a BMBA (Hons) in Business Analytics (2nd year). Strongly passionate about data science, data-driven decision-making, and technology-driven problem solving. Skilled in analytical thinking, research, and technology application, with a keen interest in exploring innovative data-oriented solutions. Recognized as enthusiastic, adaptable, and results-driven, with a strong work ethic and eagerness to continuously learn and apply new knowledge.

EDUCATION

BSc (Hons) in Information Technology Specializing in Information Technology, Sri Lanka Institute of Information Technology (SLIIT)	Oct 2022 - Oct 2026
BMBA (Hons) in Business Analytics , SAB Campus of CA Sri Lanka	August 2024 - August 2028
G.C.E. Advanced Levels, Royal College, Colombo 07 Physical Sciences Stream - 2C, 1S	August 2021

Work Experience

- Junior Analyst**
Advice Lab | 2025 - Present
- Conduct requirement gathering to understand business and user needs
 - Analyze user requirements and translate them into actionable plans
 - Develop and maintain dashboards for performance tracking and insights
 - Create project plans to support efficient execution
 - Perform post-implementation reviews to evaluate outcomes and improvements.

PROJECTS

Conducted a descriptive analytics project on student attitudes towards the LGBTQ+ community, involving survey design, data collection, analysis, and visualization.

- Conducted a quantitative and semi-quantitative observational study to explore attitudes towards the LGBTQ+ community.
- Designed and administered a structured questionnaire to a representative sample of students.
- Collected, managed, and analyzed survey data using descriptive analytics methods.
- Developed data visualizations to present findings clearly and effectively.
- Collaborated in a group setting to produce a comprehensive research report and presentation.

AcademicSync: Online Timetable Generating Web Application

- Developed an automated timetabling system using the MERN stack with TypeScript, integrating constraint-based scheduling (staff seniority, room capacity, real-time editing). Improved efficiency and user satisfaction compared to manual and FET systems.

Conducted a research and development project on an Adaptive Geofencing system for child safety, involving algorithm design, real-time data processing, and IoT integration.

- Conducted a technical study to develop dynamic safety perimeters that adapt to a child's routine using machine learning and geospatial analysis.
- Designed and implemented an intelligent geofencing logic that minimizes GPS drift and optimizes battery consumption for wearable devices.
- Developed real-time data pipelines to process location telemetry and trigger instant guardian notifications upon boundary deviations.
- Created data visualizations and spatial maps to represent movement patterns and safety zone effectiveness clearly and effectively.

ADDITIONAL INFORMATION

- **Technical Skills:** PowerBI/Looker Studio, HTML/CSS/JavaScript, Python, Jupyter Notebook, RStudio, SQL, PL/SQL, R
- **Languages:** English, Sinhala.
- **Certifications:** Introduction to Python Programming in Data Science (DataQuest), Introduction to Data Analysis in Excel(DataQuest).

ORGANIZATIONS

- Institute of Analytics (IOA)
Student Member, 2025 - Present
- Toastmasters International - Millennium Toastmasters Club
Sergeant-at-Arms (EXCO Member), 2025 - Present
